

Introducing our new DXA body composition scanning machine

With this technology we're able to measure, in detail, body fat of a patient to help more accurately determine health needs.

Consider the DXA machine for a patient if you feel they are classified in any of the following categories:

- **Patients participating in a weight management program**
- **Bariatric surgery patient**
- **Sarcopenic patients with the concern of muscle loss.**
- **Athlete's in a training or rehabilitation program/ muscle mass imaging**
- **Patients with diabetes**
- **Patients with eating disorders**

Our new DXA machine is located at our 16th Avenue Pavilion in the Yakima Endocrinology Associates building at 1470 N. 16th Ave.
